# Tanmay Nagare

Pune,Maharashtra

+91-8483043248 | tanmaynagare2204@gmail.com | tanmay-nagare | tanm08 | Portfolio

## EDUCATION

**Shrimati Kashibai Navale College of Engineering, Pune** — **2022 – 2026**
*B.E. in Computer Science and Engineering - **CGPA - 8.7*** — *Pune, India*

**Nutan Vidyalaya and AD. Ravsaheb Shinde Junior College** — **2021 – 2022**
*HSC - MSBSHSE - **Percentage - 76.17%*** — *Nashik, Pune*

## TECHNICAL SKILLS

**Languages:** Python, C++, SQL
**Developer Tools:** VS Code, Jupyter Notebook, Git, GitHub, Postman, Render
**Technologies/Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Flask, Streamlit, XGBoost
**Core Concepts:** Machine Learning, Data Analysis, Data Visualization, Exploratory Data Analysis (EDA), Data Preprocessing, Feature Engineering, Model Evaluation, Git Version Control

## INTERNSHIP

**Cognifyz Technologies** — **01 2025 – 02 2026**
*Machine Learning Intern* — *Pune, India*

- Performed data preprocessing, feature engineering, and exploratory data analysis on real-world datasets.
- Developed and evaluated Machine Learning models for regression and classification tasks using Python and Scikit-learn.
- Built a content-based recommendation system and analyzed model performance using standard evaluation metrics.
- Conducted geographical data analysis to identify location-based trends and insights.

## PROJECTS

**Stock Movement Predictor** | Python, Pandas, Scikit-learn, Flask, TA, yfinance — **07 2026**

- Built a modular ML pipeline to predict stock price movement using historical OHLCV data and engineered technical indicators (RSI, MACD, moving averages).
- Developed a Flask-based interactive dashboard supporting multi-stock analysis with real-time visualization of predicted vs actual price trends.
- Implemented a backtesting module to simulate trading strategies on historical data, evaluating performance using accuracy and cumulative returns. .

**Student Performance Indicator** | Python, Flask, Scitkit-learn, Pandas — **06 2026**

- Developed an end-to-end machine learning application to predict student performance based on demographic and academic attributes.
- Implemented data preprocessing, feature engineering, model training, and evaluation using Scikit-learn pipelines.
- Integrated the trained model with a Flask backend and built a simple web interface for real-time student performance prediction.

**Employee Management System** | Python, Streamlit, PostgreSQL, SQLAlchemy — **01 2026**

- Developed a full-stack Employee Management System featuring secure authentication, role-based access control, and PostgreSQL database integration.
- Implemented CRUD operations for employee records using SQLAlchemy, ensuring efficient and reliable data management.
- Designed an interactive Streamlit dashboard with a modular architecture, improving usability and maintainability.
